****Please note:**

Women seeking an elective prenatal ultrasound with Stonebriar Medical Imaging must already be receiving treatment with a healthcare provider for prenatal care and have already undergone a second trimester medical, diagnostic ultrasound ordered by their provider to confirm their due date, screen for fetal anomalies, and to look for any other pregnancy related issues. During the elective prenatal ultrasound session, we will be conducting a limited diagnostic scan to confirm heartbeat, the number of babies in the pregnancy, the position of the baby, ect. Please note, at no time is this exam to be used in place of a complete diagnostic ultrasound.
